

RAVEESHA DENUWAN

Cyber Security Undergraduate

Colombo, Sri Lanka | +94 71 408 2950 | raveeshadenuwan@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Analytical and detail-oriented Computing undergraduate specializing in Cyber Security, with a strong foundation in programming, networking, and database systems. Passionate about solving real-world problems through technology and developing secure, efficient software solutions. Collaborative team player with a proactive mindset, experienced in academic and practical projects, and committed to continuous learning in modern cybersecurity practices.

TECHNICAL SKILLS

Programming Languages: Python, PHP

Web Technologies: HTML, CSS, JavaScript

Database Management: MySQL

Networking: TCP/IP, Subnetting, Routing Protocols, Cisco Packet Tracer

Cyber Security: Encryption (AES), Phishing Detection, Secure Coding, Network Security, Vulnerability Assessment, Ethical Hacking

Tools & Platforms: VS Code, XAMPP, GitHub

Soft Skills: Teamwork, Communication, Continuous Learning, Critical Thinking, Leadership & Management

PROJECTS

Student Feedback & Issue Reporting System

PHP | MySQL | HTML | CSS

- Designed and developed a full-stack web application using PHP, MySQL, HTML, and CSS
- Handled 100+ simulated issue reports during testing to validate system functionality
- Built an admin dashboard to manage 3+ issue statuses: Pending, In Progress, and Solved
- Reduced issue reporting time by ~40% compared to manual reporting (testing scenario)

Encrypted Password Manager

Python | PHP | AES Encryption

- Developed a secure web-based password vault using AES-256 encryption for credential storage
- Stored and managed 50+ test user credentials with 100% encrypted at-rest protection
- Built features for securely adding, editing, and retrieving credentials

Phishing Detection System

Python | Machine Learning

- Built a Python-based phishing URL detection system trained on 1,000+ URL samples
- Applied machine learning techniques achieving ~80-90% classification accuracy in testing
- Extracted 10+ URL features (length, symbols, domain patterns) for model analysis

Secure Login System

PHP | MySQL | Security

- Full authentication system with bcrypt hashing, session management, brute-force protection, and CSRF tokens

Network Port Scanner

Python | Security

- Python-based network scanning tool to identify open ports and services on a target host

IT Helpdesk Ticket System

PHP | MySQL

- Support system where users raise IT issues and admins track, assign, and resolve tickets

EDUCATION

Higher National Diploma (HND) in Computing — Cyber Security Specialization 2026 – Present

CINEC Campus, Colombo, Sri Lanka

- Currently in Year 1, Semester 1 — specializing in Cyber Security
- Modules: Programming, Networking, Professional Practice, and Planning a Project
- Applying programming and networking concepts through hands-on academic projects

Diploma in Cyber Security & Ethical Hacking 2025

PSB University of Cambodia

- Achieved A+ in all 5 modules: Cyber Security & Ethical Hacking, Information Gathering & Scanning, Vulnerability Analysis & Exploitation Theory, Exploitation, and Anonymity

Diploma in Information Technology (DIT) 2025

ESOFT Metro Campus | Awarding Body: UK Awards SEG

- Modules: IT Concepts, Hardware & Network Technology, Python, Database Concepts, Software Engineering, AI, Web Designing, Graphic & Multimedia, MS Office, and C#

Diploma in Management (DIM) 2025

ESOFT Metro Campus | Awarding Body: UK Awards SEG

- Scored 90+ in 9 of 11 modules including a perfect 100 in Introduction to E-business

Diploma in Human Resource Management & Administration 2025

PSB University of Cambodia

GCE Advanced Level (A/L) Technology (STEM) Stream 2024

GCE Ordinary Level (O/L) 2021 / 2022
